

SIDE PANELS

OPTIONALS

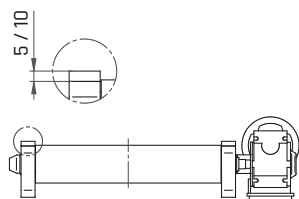

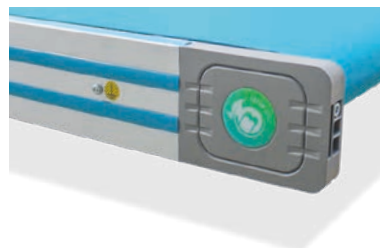

COMPATIBLE PRODUCTS

SP 00

- Conveyor without side panels
- Ideal solution in the presence of operators working directly on the conveyors
- Dowels can be inserted into the slot for installation of additional optionals

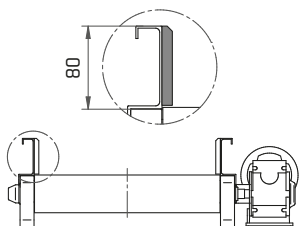

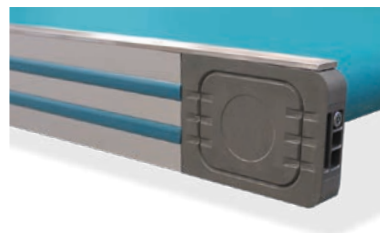

PA 110 PAR T100 PA 180 RUF

SP 01

- h 5/10 mm side panels in aluminium plate
- Solution proposed when a conveyor without side panels is required, but the large dimensions or high speed mean that a minimum level of containment of the belt is needed

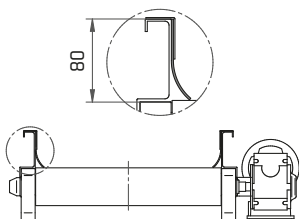

PA 110 PAR

SP 02

- h 80 mm side panels with POM-C internal lining
- Ideal solution for conveying food and pharmaceutical products or small products

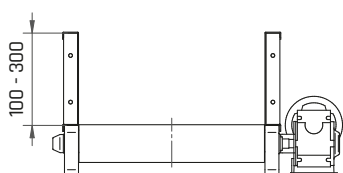

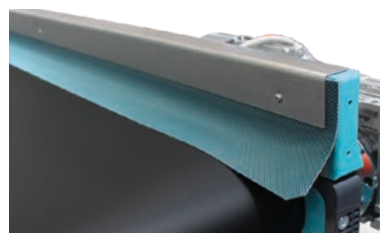

PA 110 PAR PA 180

SP 03

- Side panels covered in AISI 304 stainless steel, h 80 mm, complete with shim strips
- The shim strips ensure side sealing between the sides and the belt

PA 110 PA 180

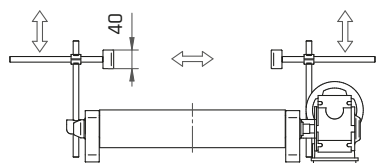

SP 04

- Side panels in AISI 304 stainless steel - from h 100 to h 300 mm
- Custom-built to allow conveying of large products or large quantities of products

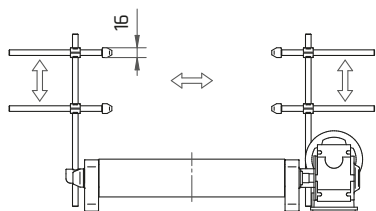

PA 110 PAR PA 180 CU 90

**SP 05**

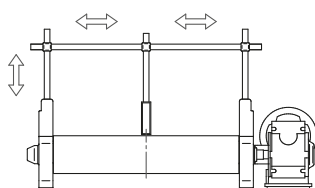

- POM-C side panels adjustable in height and width
- For conveying and guiding containers and/or products of different dimensions

PA 110 PAR T100 PA 180 RUF

**SP 06**

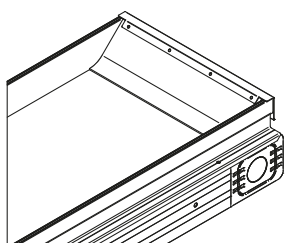

- POM-C double side panels adjustable in height and width
- For more accurate guiding of tall containers and/or products

PA 110 PAR T100 PA 180

**SP 07**

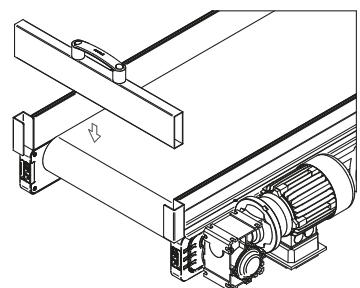

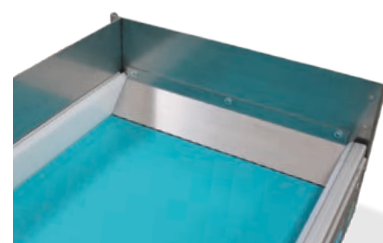

- Central partition
- For channelling into two lanes of different products that must not be mixed together

PA 110 PAR PA 180

**SP 08**

- Closed end
- Solution for preventing the product from exiting on the loading side

PA 110 T100 PA 180

**SP 09**

- Removable mechanical stop
- Solution for blocking the product at the end of the conveyor and preventing it from falling

PA 110 PAR PA 180 RUF
